CAREER OBJECTIVE

Aspiring Software Engineer and AI enthusiast with a strong foundation in Machine Learning, Data Structures, and problem-solving. Passionate about building intelligent systems using ML, Deep Learning, and Agentic AI to solve real-world problems. Seeking opportunities to contribute to innovative projects while continuously enhancing technical skills.

EDUCATIONAL QUALIFICATION

2023 – 2027	Bachelor of Engineering, Rathinam Technical Campus 8.0 in Computer Science and Engineering
2021 – 2023	Higher Secondary Certificate, Ashram Matriculation higher secondary school 75.5%
2017 – 2020	Secondary School Leaving Certificate, Amirtha Vidyalayam higher secondary school 85.0%

TECHNICAL SKILLS

- Python
- Machine Learning
- Agentic AI
- CSS
- Java
- Deep Learning
- HTML
- PostgreSQL

PROJECT

Agriculture ChatBot, TOOLS:Python, LangChain, XAI, Random Forest(ML), Streamlit, numpy, pandas

Built an AI chatbot using ML & NLP for crop and plant disease queries
Implemented intent-based responses for real-time user interaction
Enhanced response accuracy through basic preprocessing techniques

Fake Profile Detection, Tools: Python ,Pandas, NumPy, TensorFlow/Keras, Scikit-learn, streamlit

Built a Fake Profile Detection System using ML to classify real vs fake accounts
Used Random Forest on features like followers, engagement, and activity patterns
Improved accuracy through feature engineering and tuning
Developed a Streamlit UI for real-time prediction

KnowledgeHub AI, Tools:Python,RAG

Created a RAG-based knowledge retrieval platform that transforms static documents into an interactive conversational knowledge base. The application supports multiple document formats and uses semantic search to retrieve relevant content before generating precise answers with an LLM.

CERTIFICATIONS

IEEE Arduino Hackathon, Brain-Controlled Piano System

Developed a brain-computer interface (BCI) project that enables users to play a piano using brain signals captured through an EEG device. Processed EEG data to detect neural activity patterns and translated them into piano note commands in real time. Demonstrated the integration of neuroscience, signal processing, and human-computer interaction for hands-free musical control.

SOFT SKILLS

- Leadership skills
- Time management
- Good Teamwork
- Communication skills

LANGUAGES

Tamil

Hindi

English
